work samples

PROFILE

Turns operational problems into working systems, and stays accountable for what happens after deployment. 26 years across network field engineering, electrical construction, and insurance operations. Now builds and runs the AI workflows and infrastructure behind a live business: understands the business need, diagnoses the failure, builds the fix, and gives the owner the controls to operate it.

Root-cause diagnosis · AI workflow implementation · Linux infrastructure · Process automation · Security & recovery controls · Agent training

AI & AUTOMATION

SecureProspective · Founder · 2025–Present

- **AI agent operations.** Routes each task to the right local or frontier model, runs it through review gates, and requires human approval before any merge. Failed runs are recoverable without lost findings. Used daily for research, code, and content.
- **SP+ secure workstation.** Designed and released a locked-down Linux workstation (v0.11.5) for financial advisors: signed updates, 150+ automated security checks, one-step rollback.
- **Command Center.** The business's live operating dashboard. Plain-text records as the source of truth, guarded edits that cannot silently overwrite each other, priorities and marketing in one view.
- **Automated recurring operations.** Document archiving, hash-verified backups with tested restores, campaign cadences with a kill switch, and health monitoring across servers, VMs, and cloud.
- **Agent infrastructure.** Self-hosted Nextcloud portal giving insurance agents private, branded file storage and sharing; self-hosted Postiz scheduler for social publishing. Both published securely through Cloudflare.
- **Build quality standard.** Authored the rulebook AI coding agents must follow. Every change passes automated security scans and multi-agent review before a human signs off.
- **Web.** Built and deployed secureprospective.com with secure member login; migrated client sites to Cloudflare.

INSURANCE OPERATIONS

2018–2026

- Operations Manager**, Gold Shield Wealth Jun–Aug 2026
- Financial Services Consultant**, State Farm Apr–Jun 2026
- Agent Development Specialist**, Retirement Realized Financial 2024–2026
- Marketer**, DFS Marketing 2020–2024
- Lead Quality Manager, Supervising Agent**, American Income Life 2018–2020

Case design, analytics, and sales coaching; trained new agents from preparation through application and policy issue.

CONSTRUCTION & FIELD INSTALLATION

2003–2018

- Lead Installer**, Miele USA 2011–2018
- Electrician**, commercial, residential, and military-base projects 2003–2011

Promoted to foreman mid-project at Centech after the foreman quit; delivered a low-voltage resident-notification system while specs and drawings changed daily.

TECHNOLOGY

1999–2004

- Field Technician**, Insight (400+ PC migrations for Starwood) 2003–2004
- Network Field Engineer**, Pro Net Solutions (USDA WAN, 83 sites) 2002
- HP Field Engineer**, Trend-Setters (Bank of America; fixed the registry fault blocking Tivoli pushes) 2002
- HP Pavilion Support Agent**, MCI WorldCom 1999–2001

ENVIRONMENT

Proxmox and Linux VMs on premises, tunneled securely to Cloudflare (Pages, Workers, R2, D1). Git as the audit trail. Local and cloud AI models behind a human approval gate.

EDUCATION & LICENSE

Network technology coursework, High Tech Institute, Phoenix · 1999–2000 · Texas Life, Health & Annuity License
